

EVM

ENVIRONMENTAL MONITORS

The TSI Quest™ EVM Environmental Monitors simultaneously measure particulates and gas concentration in real-time. These monitors measure select toxic gases, volatile organic compounds (VOCs), relative humidity, temperature and air velocity.

Features and Benefits

- + Particulate, gas and photoionization detector (PID) measurement from a single device
- + Less equipment to carry to job site; compact, user-friendly design
- + 90-degree light scattering laser photometer measures particulates in real-time
- + Proprietary technology for selecting particulate settings; no need for external cyclones
- + Built in sampling pump allows for gravimetric analysis
- + Large, easy-to-read display with trend graphing of measurements
- + Time history data logging and compatibility with Detection Management Software makes analysis efficient

DUAL-ANALYSIS

OUTSTANDING EFFICIENCY AND VALUE

SIMULTANEOUS MEASUREMENT

- + Measures particulate mass concentrations (0.1-10 μm), select toxic gases, select volatile organic compounds, carbon dioxide, relative humidity, temperature, and air velocity (with purchase of optional accessory).
- + Helps control equipment costs, by combining three instruments into one.

Built-in sampling pump

- + Allows user to easily capture particulate samples for on/off-site analysis.
- + Identify and confirm particulate concentration in question.

Rotary impactor

- + Proprietary "dial-in" technology enables fast, easy selection of 4 different particulate size settings.
- + Eliminates the need to switch out cyclones for different measurement apertures.

90° light-scattering laser photometer

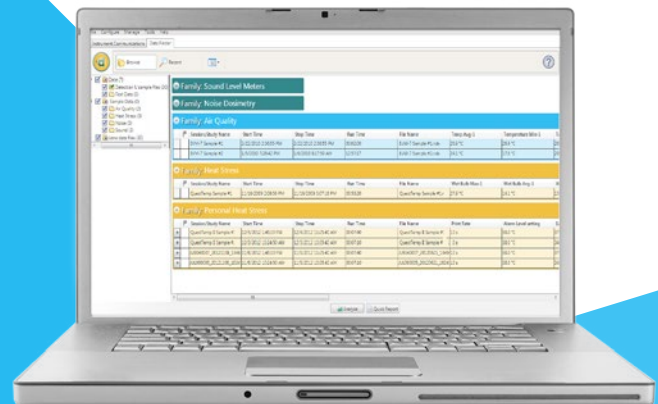

- + Enables real-time measurement of particulates.

Detection Management Software

Designed for dosimetry, sound level measurements, heat stress assessments and environmental monitoring, this advanced software helps safety and occupational professionals:

- + Configure instrumentation and save pre-configured setups
- + Retrieve, download, share, and save instrument data
- + Create charts, tables, and reports to intuitively interpret your measurements
- + Export and share recorded results

The software integrates with TSI Quest Detection Solutions data logging instruments and will help you improve both operating efficiency and reporting in acoustics, heat stress and environmental monitoring.
